Google Cloud Training

ABDULLAH AL MAHMOOD

has successfully completed the online, non-credit Specialization

G Suite Administration

The G Suite Administration Specialization has been developed to help administrators master the foundations of managing and establishing G Suite best practices for their organization. The courses cover account setup and provisioning and management of users, groups and resources. You will also explore core services such as Gmail, Calendar, and Drive & Docs and learn how to configure them. G Suite Security covers best practices to protect your users and data. You will explore user security, application security and Single Sign On (SSO) options. You will learn how to manage mail with G Suite. You will configure email compliance and learn how to protect your organization from spam, spoofing, phishing and malware attacks. Finally, you will be introduced to Google's deployment methodology.
